ABOUT ME

I'm a tech geek and curious student with a deep interest in AI, Web 3.0, and Robotics. I enjoy exploring emerging technologies, understanding how they work, and thinking about how they can be improved or used more meaningfully. With experience ranging from robotics experiments to building websites, building AI model, solving NLP problem and leading technical teams, I'm used to working hands-on, solving problems, and adapting quickly in dynamic environments. I love working on products that matter, especially those at the intersection of AI, automation, and user needs. Now, I'm excited to grow by contributing to real-world projects, learning from industry professionals, and bringing fresh insights to the table.

EXPERIENCE

Chief Technology Officer

PT. Chana Global Agridaya

2021 - 2023

- Designed and developed the official brand website for Chana Ocean
- Optimized SEO for better online visibility
- Collected and managed buyer data for business insights
- Calculated and tracked project financials

Mentor of Computer Olympiade

SMAN 1 Brebes

2021

- Helped students prepare for city, province, and national-level computer science competitions by providing training in algorithms, problem-solving strategies, and programming fundamentals.

Project Coordinator

Robotic Experiment 1 | Airlangga University

Jan 2023 – Jun 2023

- Led and coordinated a multi-disciplinary robotics team
- Created and managed detailed task timelines
- Monitored progress and resolved cross-division issues
- Handled project documentation and archiving

Mechanical Manipulator Engineer

Robotic Experiment 2 | Airlangga University

Sep 2023 – Des 2023

- Designed a lifting mechanism for an Automated Guided Vehicle (AGV) robot
- Assembled and integrated lifter components into the system
- Testing and troubleshooting of the lifter unit

Research Intern

The National Research and Innovation Agency of The Republic of Indonesia

Aug 2025 – Des 2025

- Designed Deep Reinforcement Learning Based System for Robot Arm UR5e
- Integrating Depth Object Pose Estimation to the DRL system for observation of DRL
- Training and tuning the model for a better result in simulation
- Validating the model using real robot

EDUCATION

Robotics and Artificial Intelligence Engineering

Airlangga University | Surabaya, Indonesia

2020 - Now

SKILL

- Python and C/C++
- Machine Learning
- Computer Vision
- 3D mechanical Design (Autodesk Inventor)
- PLC Programming
- NLP
- Deep Learning
- ROS
- Isaac Sim & Isaac Lab

PROJECT

Chana First Coco Website Development

PT. Chana Global Agridaya

Developing website for company profile of an exporter brand from PT Chana Global Agridaya that focused on coconut derivative product based on Indonesia

Chana Ocean Website Development

PT. Chana Global Agridaya

Developing website for company profile on an exporter brand from PT Chana Global Agridaya that focused on fish product based on Indonesia

Line Follower Robot

Airlangga University

Developing autonomous robot for following the line as one of the experiment on campus.

AGV Object Lifter

Airlangga University

Developing autonomous robot to lift an object and place it on desire place, as one of the experiment on campus.

Machine Learning Based Project

Airlangga University

There is a lot of small project I work on as a student for some classes assignment such as fuzzy logic, decision tree, genetic algorithm, etc.

Computer Vision Project

Airlangga University

There is some computer vision project that I work on as a student for some classes assignment such as image sementation, object classification, etc.

Natural Language Processing Project

Airlangga University

There is some NLP Project I work on as a student for some classes assignment such as information extraction, news classification, etc.

Deep Reinforcement Learning Implementation for Robot Arm for Pick and Place Task Using April Tag Observation

The National Research and Innovation Agency of The Republic of Indonesia

Designing DRL for robot arm using PPO Algorithm to do pick and place task with task decomposition and computer vision as one of the observation.
